# Forward Looking Statements

## **Forward-Looking Statements**

This presentation has been prepared by Kestrel Group Ltd. ("Kestrel," the "Company" or "we") and contains forward-looking statements. All statements other than statements of historical fact contained in this presentation, including statements regarding our future results of operations and financial position, business strategy and plans and objectives of management for future operations, are forward-looking statements. These statements involve known and unknown risks, uncertainties and other important factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Our forward-looking statements are generally, but not always, accompanied by words such as "estimate," "believe," "expect," "will," "plan," "target," "could" or other words that convey the uncertainty of future events or outcomes. The forward-looking statements in this presentation are only predictions. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our business, financial condition, results of operations and liquidity. Accordingly, we caution you that any such forward-looking statements are not guarantees of future performance and are subject to risks, assumptions and uncertainties that are difficult to predict and beyond our ability to control. Although we believe that the expectations reflected in these forward-looking statements are reasonable as of the date made, actual results may prove to be materially different from the results expressed or implied by the forward-looking statements.

If one or more events related to these forward-looking statements or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Many of the important factors that will determine these results are beyond our ability to control or predict. Accordingly, you should not place undue reliance on any such forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made, and, except as otherwise required by law, we do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New factors emerge from time to time, and it is not possible for us to predict which will arise. We cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We urge you to read documents we have filed with the SEC for more complete information about the Company, which are made publicly available at [www.sec.gov](http://www.sec.gov) and via our website, [kestrelgroup.com](http://kestrelgroup.com), and to stay apprised of additional risks and uncertainties to be described in our periodic reports filed with the Securities and Exchange Commission from time to time. Any forward-looking statements in this presentation should be evaluated in light of the information in these documents.

In addition, statements that "we believe" and similar statements reflect our beliefs and opinions on the relevant subject. These statements are based upon information available to us as of the date made, and while we believe such information forms a reasonable basis for such statements, such information may be limited or incomplete, and our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. These statements are inherently uncertain and you are cautioned not to rely unduly upon these statements.

## **Industry Information**

Unless otherwise indicated, information contained in this presentation concerning our industry, competitive position and the markets in which we operate is based on information from independent industry and research organizations, other third-party sources and management estimates. Such information is as of its original publication dates (and not as of the date of this presentation). Management estimates are derived from publicly available information released by independent industry analysts and other third-party sources, as well as data from our internal research, and are based on assumptions made by us upon reviewing such data, and our experience in, and knowledge of, such industry and markets, which we believe to be reasonable. In addition, projections, assumptions and estimates of the future performance of the industry in which we operate and our future performance are necessarily subject to uncertainty and risk due to a variety of factors, which could cause results to differ materially from those expressed in the estimates made by the independent parties and by us.

## **Non-GAAP Financial Measures**

This presentation uses financial measures that are not presented in accordance with generally accepted accounting principles in the United States ("GAAP") to supplement financial information presented in accordance with GAAP. There are limitations to the use of the non-GAAP financial measures presented in this presentation. For example, the non-GAAP financial measures may not be comparable to similarly titled measures of other companies. Other companies may calculate non-GAAP financial measures differently than the Company, limiting the usefulness of those measures for comparative purposes. See slides 26-29 for reconciliations of such non-GAAP financial measures to their most directly comparable GAAP measures.

|---|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ? | Reinsurers' Inability or Unwillingness to Pay | ✓ Including the Ledbetter's tenure at both State National and Kestrel, a thorough credit underwriting process has led to over \$20bn+ in reinsured premium written with zero instances of reinsurance recoverable losses |
| ? | Insufficient Collateral Requirements          | ✓ Kestrel contracts include tighter default triggers relating to collateral                                                                                                                                              |
| ? | Bad Debt Exposure to Agents/MGAs              | ✓ Kestrel more likely to have parent company and personal guarantees                                                                                                                                                     |
| ? | Regulatory Concerns                           | ✓ Kestrel has access to widely licensed insurance carriers and can adjust business focus away from unfriendly jurisdictions                                                                                              |
| ? | Unclear MGA Underwriting Guidelines           | ✓ Kestrel contracts provide clear guidelines with steep penalties keeping MGAs within their circle of competence                                                                                                         |

# Non-GAAP Financial Measures Footnotes

(1) Book value per common share is calculated using common shareholders' equity divided by the number of common shares outstanding. Management uses growth in this metric as a prime measure of the value we are generating for our common shareholders, because management believes that growth in this metric ultimately results in growth in the Company's common share price. This metric is impacted by the Company's net income and external factors, such as interest rates, which can drive changes in unrealized gains or losses on our investment portfolio, as well as share repurchases.

(2) Underwriting and fee income related general and administrative expenses is a non-GAAP measure and includes expenses which are segregated for analytical purposes as a component of underwriting and fee income (loss).

(3) Underwriting and fee income or loss is a non-GAAP measure and is calculated as net premiums earned plus fee revenue less net loss and LAE, commission and other acquisition expenses and general and administrative expenses directly related to underwriting and fee revenue activities. For purposes of these non-GAAP operating measures, the fee-generating business, which is included in our Program Services segment, is considered part of the underwriting and fee income operations of the Company. Management believes that this measure is important in evaluating the underwriting and fee income performance of the Company and its segments. This measure is also a useful tool to measure the profitability of the Company separately from the investment results and is also a widely used performance indicator in the insurance industry.

(4) Non-GAAP operating earnings (loss) and non-GAAP basic and diluted operating earnings (loss) per common share are non-GAAP financial measure defined by the Company as net income (loss) excluding realized investment gains and losses, foreign exchange and other gains and losses, interest in income (loss) of equity method investment, and amortization of intangible assets and should not be considered as an alternative to net income (loss). It also excludes on a non-recurring basis: (1) loss from discontinued operations, net of income tax; (2) the bargain purchase gain resulting from the Combination; (3) litigation costs from GLS related arbitration; (4) restructuring and severance costs; (5) and costs incurred due to the Combination. The Company's management believes that the use of non-GAAP operating earnings (loss) and non-GAAP diluted operating earnings (loss) per common share enables investors and other users of the Company's financial information to analyze its performance in a manner similar to how management analyzes performance. Management also believes that these measures generally follow industry practice therefore allowing the users of financial information to compare the Company's performance with its industry peer group, and that the equity analysts and certain rating agencies which follow the Company, and the insurance industry as a whole, generally exclude these items from their analyses for the same reasons. Non-GAAP operating earnings should not be viewed as a substitute for U.S. GAAP net income.

(5) Non-GAAP operating return on average shareholders' equity is a non-GAAP financial measure. Management uses non-GAAP operating return on average adjusted shareholders' equity as a measure of profitability that focuses on the return to common shareholders. It is calculated using non-GAAP operating earnings divided by average shareholders' equity.

(6) Investable assets are the total of the Company's investments, cash and cash equivalents, net loan receivable from related party and funds withheld receivable.

(7) Total capital resources are the sum of the Company's principal amount of debt and shareholders' equity.

(8) Premium produced is an operating metric determined by management as a byproduct of the program services fees it earns and is paid by clients. Premium produced is equal to the premium written by an MGA or capacity provider, and management believes this measure is important in understanding the underlying production trends of its Program Services business and the fees it earns. Where available, the Company utilizes underlying premium produced as reported by its clients. Where the premium produced was not directly observable, the Company derived the premium produced by grossing up the known fee component using the applicable contractual fee percentage, including its arrangements with its insurance carrier partners.
